

January 10, 2001

Dear Clear Bra Connection:

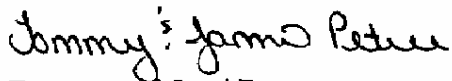

We would like to personally thank you for the exceptional job you did on the clear bra for our 2001 Dodge Dakota.

After going to another local clear bra company, we were extremely dissatisfied with their service and their product. Not only did they scratch our new vehicle while placing the clear bra on it, but also the quality of their product was extremely poor. Two weeks after having the installation complete we noticed that their film was already starting to lift off our vehicle's finish, and that there were many small scratches through out the surface of their film. We also realized that their product was not a custom product, but rather a kit to be used on our vehicle, due to this fact, the clear bra did not cover the edges of the hood and fenders, leaving a 1/4" gap for potential rock chips and damage.

After having you come out and look at the vehicle, and the previous film installation, we were extremely impressed with your professionalism, honesty and the way you treated our vehicle as if it was your own. We were also extremely impressed with your product and installation. Not only is your product a custom product that is specifically cut at the time of installation and does not leave edges unfinished and exposed to potential damage, but the quality of your material and workmanship far exceeds our expectations.

It is truly nice to find an honest company that stands by their product and workmanship. We would like to thank you once again for all that you have done.

Sincerely yours,
